

CUT ANY OF THESE SHAPES PLUS MANY MORE!

CUTS VIRTUALLY ANYTHING PERFECTLY SQUARE!

"MIGHTY-MITER"®

Range 3/16" to 2"

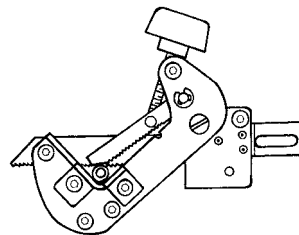

THE MIGHTY-MITER™ SECURES MATERIAL TO BE CUT WITH AN ADJUSTABLE QUICK CLAMPING SYSTEM

Cat. #MM-175

Patent # 5,611,146
Other Patents Pending

- This labor saving accessory makes it a snap to cut at a right angle any material: round, square, or rectangular tubing, wood or plastic molding, angle bar, EMT, Unistrut®, threaded rods, etc.
- The *Mighty-Miter* can be attached to many different reciprocating saws. Just select the proper adapter for your brand - no modification required. (*Mighty-Miter and adapter also sold separately*)
- The unique clamping system can be quickly adjusted to accept all different sizes of material from 3/16" to 2". The clamping bar is designed with a chamfer at the tip to permit the clamping of very small rods.
- With a simple turn of a thumb screw material is clamped in the vise & swung upwards to make a perfectly square cut.
- The *Mighty-Miter* can easily cut long lengths of material right on the ground! Simply clamp the material in the vee, start the saw and apply downward pressure. The clamping assembly is designed to automatically swing upward which provides a neat way to cut heavy or large size material in place.
- Angle cuts can be made on the ends of some flat material up to 1/2" thick by simply using the clamping system to secure it at an angle.
- The *Mighty-Miter* can be easily removed. This permits the reciprocating saw to be used as a conventional saw by simply reinstalling the standard shoe.

A NEW CONCEPT IN RECIPROCATING SAW ACCESSORIES

Choose the Mighty-Miter® for your Reciprocating Saw

MM-175RS	Mighty-Miter for Milwaukee® Sawzall®
